Create Quote

1. On the Dashboard select a submission from the Quote folder and click **Create Quote**.
2. Choose the batch and languages you want to quote for, select the **Auto-Propagate Line Items** checkbox to automatically populate the additional cost for all languages when you add cost for one language, and click **Proceed**.
3. For each language, enter the quote for additional line items and click **Next**.
4. Once all languages are quoted click **Finish**.

Translate Submission

1. On the dashboard view new submissions in the **Available** folder.
2. Choose a submission and click **Claim Translation** under the **translation** tab.
3. Select the batches you want to translate and click **Claim Translation**.

Select the files for download. Click on the **here** link to download the translation kit, which includes the source files, reference files, TM leverage report and the local translation memory file.

Claim Translation

Please select item(s) for 'translation' phase

Upload Deliverable

1. On the Dashboard view claimed submissions in the **Inbox** folder.
2. Choose a submission and click **Upload** under the **translation** tab.
3. Click **Browse...** to select the translated TXML file or zipped folder with a batch of TXML files and click **Upload**.
Note: If this is the final step in the workflow the Workflow Status of the uploaded submission will move to the **Sent** folder, marked as Completed and the Progress Bar will be highlighted in green and 100%. If this is not the final step in the workflow the Workflow Status of the submission will indicate the specific task name.
