When modifying a target segment, you will also need to provide a grade based on the modification in the translated content. This is very important to continuous improvement of the linguistic partners that Cook Medical works with. The Translation & Review Portal includes a customized grading and scoring Quality Assurance model for Cook Medical.

To grade and score translated content:

1. Double-click in the **Modified Target or Current Target box and edit the translation.**
2. Click in the **G&S** column.
3. The Grading and Scoring dialog box appears.
4. Select the **Grade** and **Score** from the drop down lists.

TIPS:

- A Grade should be selected before a score.
- You can provide multiple grading and scoring for a segment.
- Duplicate Grade and score is not allowed.
- You can click a grading and scoring to edit the entered values.
- You can click on the red cross to delete a grading and scoring.

5. Click **Close**.

The grading and scoring is saved and the Grade icon is marked in green Grade

NOTES:

- All modified segments must be graded in order for the submission to be successfully marked as completed.
- If you modify a segment and decide for some reason to undo your changes to revert it back to its original translation, you will need to set your scoring to 'None' value, grading can instead be set to any of the available values as this will not affect the review global evaluation.
